Work Experience

corentinrenard.com / Freelancer

DECEMBER 2021 - PRESENT, PARIS

I collaborate with small businesses, independent professionals, and non-profit organizations to design and build custom digital experiences, from UX/UI design to full-stack development. Working directly with clients, I translate business goals and brand identity into maintainable, user-centered websites. Notable projects include Les Chemins du Pain, for which I created the digital identity and website from the ground up. I also contributed as a paid writer for AsyncApp, producing content focused on web development.

Ministry of Defence / Webmaster apprenticeship

AUGUST 2025 - SEPTEMBER 2026, PARIS

I led the modernization of an internal SharePoint portal serving the French Navy Headquarters, redesigning the user experience and developing a React-based interface layer within a constrained technical environment. I transformed user feedback into practical UX improvements while ensuring long-term maintainability through a platform-agnostic architecture. I also created Sand.js, an open-source TypeScript visualization library powering an interactive organizational map.

Grafix / Design Intern

2018, DAX

I supported graphic design projects for commercial vehicles and aircraft liveries, contributing to visual layouts and branding applications while gaining my first exposure to professional design workflows.

Leadership & Community Involvement

Chapitre Saint Lazare / Team Leader

2023 - PRESENT, DAX

Lead and coordinate a team of approximately fifteen members throughout the year and during summer activities, fostering collaboration, responsibility, and group cohesion.

AGSE / Patrol Leader & Assistant Scout Leader

2017 - 2023, DAX

Led and mentored youth groups through camps, outdoor activities, and community projects, developing leadership, organization, and team-management skills.

Education

Sup de Vinci / Bachelor's Degree

SEP 2023 - SEP 2026, PARIS

Studied software engineering, web development, and modern application architectures through a combination of academic coursework and professional experience.

La Sauque / French general Baccalaureate

SEP 2020 - JUL 2023, BORDEAUX

Graduated with concentrations in Mathematics and Computer Science (NSI).

Skills

Combining UX/UI design, full-stack web development, and product thinking, I design and build user-centered digital experiences using modern technologies such as TypeScript, Vue/Nuxt, AdonisJS, Supabase, and Figma, while collaborating closely with clients and stakeholders throughout the product lifecycle.

Interests

My interests include software development, theology, philology, space and physics, collective behavior, creative writing, foreign languages, martial arts, and the Camino de Santiago (Compostela).

Languages

French (Native)
English (Fluent)
Spanish and Chzech (Basics)
